

Collaborative, cloud-based workbench environment, bringing together users and providers of data and text analytics tools. It will support researchers transitioning to code-based text analysis, with the resultant benefits of flexibility, reproducibility and reuse.

Aim to **develop computational HASS infrastructure**

- **Collation of projects**  
(diversity of audiences, needs, and approaches)
- **Development of resources**  
(websites, tools, static and interactive notebooks)
- **Upskilling and engagement**  
(workshops, seminars, trainings)
- **Continuing support** (consultation and 1:1 support)
- Generating **vectors** (educators and fellows)
